

Field Intelligence Platform for Precision Agriculture

SOP-based crop management • Real-time farmer guidance • Complete traceability

THE CHALLENGE

Agronomists manage hundreds of farmers across thousands of acres—but field data is **scattered in notebooks, WhatsApp, and memory**. By the time problems surface, **damage is done**. Farmers need timely, stage-wise guidance, but agronomists lack tools to deliver it at scale.

WHAT IS UNNATI?

UNNATI is a **digital agronomy platform** that enables agronomists to manage SOPs, track crop progress, deliver timely interventions, and ensure compliance—all from one centralized dashboard.

KEY FEATURES

- ✓ **SOP-Based Guidance:** Stage-wise recommendations following ICAR-IIVR protocols
- ✓ **Real-Time Interventions:** Set priorities, track actions, add photos & notes
- ✓ **Crop Progress Tracking:** Compare ideal vs actual dates across all farms
- ✓ **Weather Intelligence:** Weather-based action guides for proactive management
- ✓ **Market Linkage:** Weekly/monthly yield projections & rate forecasts
- ✓ **Complete Traceability:** Digital records from seed to harvest

WHO SHOULD USE UNNATI?

Agronomists

FPOs & Clusters

Seed Companies

Irrigation Providers

Protected Cultivation

Export Buyers

BENEFITS

- ✓ **For Agronomists:** Manage 100+ farmers with ease, track compliance, prevent issues before they escalate
- ✓ **For Farmers:** Get timely advice, follow proven SOPs, improve yields & quality
- ✓ **For Buyers:** Ensure quality, track compliance, plan procurement with yield forecasts
- ✓ **For FPOs:** Cluster-level reporting, better coordination, market-ready production
